PROFILE

Agentic Software Engineer with **3 years of experience** in backend development, API design, and system optimization using Laravel, with hands-on experience building AI-powered production applications. Experienced in Agentic AI, Retrieval-Augmented Generation (RAG), LLM integration, tool calling, and AI workflow automation using the OpenAI API, Model Context Protocol (MCP), and Claude Code. Proven track record of delivering scalable solutions across e-commerce, travel, hospitality, and education platforms, with expertise in performance optimization, automated testing, and VPS deployment.

EXPERIENCE

Software Engineer Grade 1

6am Tech

05/2025 – Present

Dhaka, Bangladesh

- Developed AI-powered features for a large-scale multi-vendor e-commerce platform, including an LLM-powered Shopping Assistant, personalized homepage, and Auction module.
- Built AI automation workflows with OpenAI APIs, optimized backend architecture by eliminating 100+ redundant database queries, and improved development efficiency using AI-assisted engineering.
- Implemented Playwright end-to-end testing and resolved critical production issues to improve application reliability.

Jr. Software Engineer

Codeware Ltd.

10/2023 – 04/2025

Dhaka, Bangladesh

- Developed scalable flight, hotel, and tour booking platforms with secure B2B/B2C APIs and multi-gateway payment integration.
- Improved application performance by 40% through Redis caching and backend optimization while building multiple admin and partner portals.

PROGRAMMING SKILLS

AI Engineering: Agentic AI | Retrieval-Augmented Generation (RAG) | LLM Integration | Tool Calling | Prompt Engineering | Semantic Search | Streaming AI (SSE) | AI Workflow Automation | OCR Integration

Agentic Tooling: Claude Code | Codex | OpenSpec | Model Context Protocol (MCP) | Multi-Agent Development (Conductor) | OpenAI API | OpenRouter | GitHub Copilot | Cursor IDE

Testing: Laravel Dusk (Basic) | Pest (Architecture Testing) | Playwright (E2E Browser Automation)

Backend: PHP | Laravel | REST API Design | Livewire | Inertia.js | Queues | Redis | Caching

Frontend: JavaScript | Vue.js | HTML5 | CSS3 | Tailwind CSS | Bootstrap | AJAX

Data & Testing: MySQL | Redis | SQL | Playwright (E2E) | Pest | Laravel Dusk

Architecture: Domain-Driven Design (DDD) | System Design | Performance Optimization | Scalability | Production Debugging

DevOps & Platform: Ubuntu Linux | VPS Management | Docker | Nginx | Supervisor | Git | GitHub Actions | CI/CD

PROJECTS

UniNexus — AI Academic Copilot for University Management

University management platform featuring RAG-based academic search and Agentic AI.

- Built a production-ready RAG pipeline with semantic retrieval, citations, and confidence scoring.
- Developed permission-aware Agentic AI capable of study planning, quiz generation, office-hour booking, and flashcard creation.
- Designed pluggable AI providers, streaming responses, RBAC (46 permissions), OCR-powered handwritten note indexing and face detect during exam.

6valley - A multi-vendor ecommerce system 	03/2025 – Present
Enterprise multi-vendor marketplace with AI-powered shopping experiences Built an AI Shopping Assistant, LLM-personalized homepage, and Auction module while optimizing high-traffic APIs and eliminating 100+ redundant queries.	
Etripi - Online Hotel Booking System 	11/2024 – 03/2025
Online hotel reservation and booking platform. Built booking modules and resolved production scalability and timeout issues.	
Fanamtrip.com - Online Flight Booking System 	02/2024 – 11/2024
Enterprise flight booking system supporting B2B and B2C travel agencies. Developed booking APIs, payment integrations, visa-processing workflows, Redis optimization, and admin/partner portals.	
Snowsearch.com - Tour Booking System 	10/2023 – 01/2024
Australian tour booking platform. Developed reservation APIs and optimized backend performance following clean architecture principles.	

EDUCATION

B.Sc. in Computer Science & Engineering	04/2022 – 2026
Northern University Bangladesh 	Dhaka, Bangladesh
